

ADVANCED AIRWAY DOCUMENTATION FORM (physician copy)

Dear colleague,

Today your patient born,...../...../..... needed an airway management procedure at our hospital

We observed that your patient needed **advanced airway management techniques** to secure the upper airway. This was:

- Unanticipated
- Anticipated, because _____

Complexity factors:

- Large tongue
- Buck teeth
- Morbid obesity
- Limited mouth opening
- Unstable vital signs
- Tumor in airway
- Short neck
- Bleeding
- Limited neck movement, flexion
- Anterior larynx
- Other complexity:.....

Bag mask ventilation:

- Easy
- Difficult
- Impossible

The airway was secured:

- Awake
- Asleep
- Unsuccessful

with:

- Direct laryngoscopy blade type: _____, grade CL: __
- Flexible intubation
- Videolaryngoscopy: device and blade:
- Rigid scope
- Front of neck access
- Stylet/bougie
- High flow humidified oxygen
- other: _____
- Blind nasal intubation
- Supraglottic airway device:

My advice for future airway management procedures:

- Induction of anaesthesia with short acting drugs and advance equipment
- Awake intubation
- Other technique: _____

Best regards,

Anesthesiologist/trainee
